

Search Use Case

Basic Course:

The system displays the Search Page.

The Employee enters the claim number, policy number, or policy holder information and clicks the Search button.

The system searches the database for the inputted criteria and displays the Search Results Page showing the resulting Claim List.

Alternate Courses:

Employee not logged in: The system invokes the Login use case. After the Employee logs in, the system displays the Search Page.

No claims found in search: The Search Not Found Page is displayed.
