

Project Title: Car Insurance Software Package

Team name: The Ragtag Group of Insurance Wizards

Project description:

Design and develop a software package for a car insurance company. An Android mobile application will be designed for car insurance customers. The application will be designed with a user-friendly GUI for the customer. Other features will include: submitting an insurance application, receiving registration, changing policies and starting a claim. A web-based application will be designed for the insurance employees, to view/manage customer information and aid with the claims process. More features can be considered based on the project timeframe and requirements.
